Tree pest caterpillar control program continues

The City of Winnipeg will continue its tree pest caterpillar control program Wednesday night at **9:30 p.m.** in **Insect Management Area 21 (Fort Richmond)**. Spraying is scheduled to occur Sunday to Thursday evenings during this projected 4-week program. Treatment will only occur when the weather conditions are conducive for spraying.

Treatment will be conducted utilizing *Bacillus thuringiensis* subspecies *kurstaki* (Btk), a biological, organic product which is sprayed from high pressure tree sprayers directly onto the foliage of the trees. Once Btk is ingested by the tree pest caterpillars, they stop feeding and perish approximately two to three days later. This product has been approved for use in Canada by Health Canada's Pest Management Regulatory Agency, and will be used in accordance with federally approved label directions by licensed pesticide applicators.

Buffer zones

All buffer zones will be respected. Crews will ensure that the sprayer is not treating within 30 metres on each side of a registered property on the front street, side street, and rear lane.

Residents can apply for a 30-metre buffer zone to exempt their property during the tree pest caterpillar treatment program. Property owners not wanting insecticides applied on or adjacent to their principal residence may register as "Anti-Pesticide Registrants" for tree pest caterpillar control using Btk. Those who want to register must provide identification that ties the registrant to the address being registered for a buffer zone. A photocopy or scanned document such as a driver's licence or utility bill will suffice as acceptable identification proving primary residence.

Buffer zone applications must be received through one of the following options:

- [311 online service request](#)
- Email 311@winnipeg.ca
- Fax 311
- In writing to the Insect Control Branch at 3 Grey St., Winnipeg MB R2L 1V2

- In-person at [1539 Waverley St.](#)

Register for notification

The Insect Control Branch offers an automated telephone and email notification system. Residents who register for this service will receive daily phone or email notifications for all tree pest caterpillar control activities. Residents can register for [notification online](#) or by [contacting 311](#).
